

MUHAMMAD ZAIN TARIQ

muhammadzaintariq319@gmail.com | [Linkedin](#) | [GitHub](#) | Dunyapur, Punjab, Pakistan

SUMMARY

UI/UX Designer and Software Quality Assurance professional with expertise in manual testing, test case design, and user-centered design. Proven ability to identify usability issues and functional defects through comprehensive testing methodologies. Combines design thinking with technical QA skills to deliver high-quality software products. Proficient in HTML, CSS, SQL, Python, Figma, Flutter, Dart, and multiple testing approaches including functional, regression, UAT, and performance testing.

EDUCATION

Air University Multan

Bachelor of Science in Software Engineering

September 2023 – Present

Punjab Group of Colleges

Intermediate in Computer Science

2021 – 2023

PROFESSIONAL EXPERIENCE

UI/UX Designer Intern | Softverse Solution

July 2025 – August 2025

- Designed intuitive UI/UX for web and mobile applications using Figma, improving user satisfaction and usability metrics
- Created wireframes, mockups, and interactive prototypes for e-commerce, fintech, and grocery delivery applications
- Collaborated with cross-functional development teams to ensure consistent design implementation across products
- Applied user-centered design principles and usability heuristics to enhance overall user experience
- Delivered 4+ complete mobile app designs including ZentroPay (digital wallet), Zectar (grocery app), and Dropp (fashion e-commerce)

PROJECTS

Cultivest – Smart Farming Marketplace & Advisory Platform | Flutter, Dart, SQLite | Mobile App Development University Project

May 2025 – Jun 2025

- Developed a smart agriculture platform enabling direct farmer-to-consumer trading, expert consultation, weather forecasting, community discussions, and educational learning resources
- Implemented role-based authentication, offline data storage using SQLite, and GPS-based location services
- Built responsive cross-platform user interfaces using Flutter and Provider state management
- Applied HCI principles including consistency, visibility, feedback, and user control throughout design process

GreenTrace – Smart Crop Health & Farm Monitoring Platform | Software Project Management University Project | Jira, Confluence, Agile Scrum

May 2025 – Jun 2025

- Led a 5-member Agile team developing a smart agriculture platform using Scrum methodology across 3 sprints
- Managed product backlog of 12 user stories and 18 subtasks (77 story points) using Jira Software
- Designed and implemented responsive frontend interfaces for crop health monitoring, pest reporting, and admin dashboard modules
- Configured Jira workflows including custom fields, labels, filters, and dashboards for real-time progress tracking
- Integrated GitHub with Jira for development traceability, maintaining 80+ commits linked to project issues
- Documented project requirements, sprint plans, and progress reports using Confluence with embedded Jira issues
- Achieved 100% sprint completion rate (77/77 SP) with zero unresolved bugs across all testing cycles

Manual Testing of Authentication Module – Abercrombie & Fitch (E-commerce)

Feb 2026 – Mar 2026

- Performed manual testing of core authentication flows including Signup, Login, Forgot Password, and Reset Password on a live e-commerce platform
- Designed and executed 120+ comprehensive test cases covering positive and negative scenarios, field validations, password policies, and edge cases
- Identified critical defects such as password visibility issues, missing length validation, weak phone number validation, and flaws in password reset flow
- Created structured QA documentation including test cases and detailed bug reports with severity levels, reproduction steps, expected vs actual results, and recommended fixes

Remove.bg Web Application Testing | SQE University Project

Nov 2025 – Dec 2025

- Developed comprehensive test plan for AI-powered background removal platform with 10+ testing methodologies
- Designed and executed test cases validating functional requirements, UI/GUI elements, and AI accuracy

- Conducted functional, usability, smoke, sanity, regression, integration, system, UAT, compatibility, and performance testing
- Documented defects and prepared detailed testing documentation for academic evaluation and quality assurance

TechForum – Student Tech Community App | *UI/UX Design Project*

Nov 2025 – Dec 2025

- Designed complete mobile app interface for university tech community featuring onboarding, authentication, discussions, Q&A, events, and profiles
- Applied modern mobile design standards and usability heuristics to create engaging student experience
- Developed user flows and interactive prototypes in Figma emphasizing clear navigation and visual hierarchy

ZentroPay – Mobile Banking & Digital Wallet | *Softverse Solution*

Jun 2025 – Jul 2025

- Designed end-to-end mobile banking application including onboarding, transfers, QR payments, bill payments, and analytics
- Implemented consistent visual hierarchy and intuitive navigation following financial app security standards
- Created accessible, user-centered design ensuring smooth and trustworthy user experience

Fashion E-Commerce App (Dropp) | *Softverse Solution*

Jul 2025 – Aug 2025

- Designed modern shopping experience covering product listings, search, favorites, cart, checkout, and order confirmation
- Applied minimal UI design with clear product hierarchy and consistent typography for professional user experience

TECHNICAL SKILLS

Quality Assurance: Manual Testing, Test Case Design, Test Planning, Bug Reporting, Functional Testing, Regression Testing, UAT, Integration Testing, Performance Testing, Smoke/Sanity Testing, Usability Testing, Compatibility Testing

Design Tools: Figma, Wireframing, Prototyping, User Flow Design, UI/UX Design

Programming & Technologies: Python, HTML, CSS, SQL, Flutter, Dart, SQLite, Git, GitHub, Jira, Confluence, JMeter

Project Management: Agile Scrum, Sprint Planning, Product Backlog Management, Jira Workflows, GitHub Integration, Confluence Documentation

Core Competencies: Requirements Gathering, User-Centered Design, Design Thinking, Cross-functional Collaboration, Documentation, Attention to Detail
